

Curriculum Vitae of: Christo Van Wyk

BIOGRAPHY

My passion is working with computers, learning, and trying to make an improvement in the IT industry. I love learning new things every day even if it is something difficult to comprehend. When I work with a computer I would find the most logical ways to identify a problem, and solving it with the correct methods. I love learning things from other people, and to solve problems in more efficient ways that can be beneficial for productivity. I've learned new things about computer hardware and software at college, and even did things above the scope of the CompTia A+ and Network+. I am very hardworking and motivated to work, and looking forward to enhance my experience, and skillset in information technology. I would love to try to achieve more certifications in IT.

Technical Experience

- Dual-booting Linux and Windows Environments on a single HDD
- Installing Linux distros like Ubuntu, and experimenting with Linux servers like Cent OS
- Installing Windows Environments like Windows Server 2012 at college(out of scope work)
- Installing Windows XP,7,8,8.1, and 10
- Troubleshooting Windows, Linux and Mac OS
- Troubleshooting Networks using IPCONFIG commands such as ipconfig /release /renew /flushdns
- Identify problems on a network such as DHCP problems by seeing a 169.x.x.x IP address on a host on a network
- Fixing missing Windows files using a CLI(command line interface) and commands such as sfc
- Exchanging computer hardware when there is a problem, like a BSOD can mean a memory error, and the RAM may be exchanged to try and fix the issue
- Following troubleshooting steps to fix a computer/network based problem, like first trying simple, logical solutions like checking if the power cord is in when the computer cannot turn on, or making sure the network cable is connected. Working upwards with troubleshooting steps, and first trying more logical solutions and then more complicated solutions.
